## WORK EXPERIENCE

---

### Software Engineer

Feb 2023 - Present

Access Automation | Bengaluru, India

- Successfully managed end-to-end development of a CA management web-based application, ensuring on-time delivery.
- Demonstrated expertise in full-stack development, overseeing both front-end and back-end aspects of the CA management application.
- Collaborated effectively with cross-functional teams, including IoT collaboration for web-based applications.
- Acquired a deep understanding of building products from scratch, showing adaptability and a proactive approach to learning new technologies.
- Stayed current with industry trends, showing adaptability and a commitment to professional growth.
- Engaged with clients to gather requirements and feedback, ensuring alignment with their expectations.
- Developing an AI-based app using existing AI tools.

## PROJECTS

---

### Personal Portfolio

- Designed and developed a personal portfolio using React.js featuring a dynamic display of my professional works and about me.
- Implement modular, reusable React components to optimize development efficiency and enhance maintainability.
- Integrated a dedicated project showcase section within the portfolio, providing a comprehensive overview of professional works.

### Weather App

- Developed a user-friendly weather application to access real-time weather reports for both current locations and user-specified cities.
- Used React and Material-UI for icons and responsive user interface, enhancing overall user experience.
- Successfully implemented API integration with OpenWeatherMap to fetch and display up-to-date weather information in the weather app.
- Implemented reusable components in the weather app and utilized component-based development to enhance code maintainability and scalability.

### DMWS

- Developed an NGO website, showing their mission, works, and motto to amplify their online presence.
- Implemented dynamic content presentation on the website, effectively communicating the NGO's activities and mission.
- Integrated forms for user engagement and data collection, facilitating communication between the NGO and its audience.
